Subject CRS Site -- Waste-In Volume Attributable to Studebaker Chemical

US EPA RECORDS CENTER REGION 5

Marsha:

It is my understanding that, in 2001, U.S. EPA hired TechLaw, Inc. to develop a volumetric ranking of wastes sent to the Site. Based on documents I have reviewed, it is my further understanding that, after completing its work, Techlaw attributed 5,349 gallons of waste to Studebaker Chemical.

Obviously, in connection with the review being conducted by our client to facilitate the completion of its responses to the Agency's 104(e) request in this matter, our client would like to review any and all documentation that allegedly links Studebaker Chemical to the CRS Site. Accordingly, kindly forward to me copies of any documents relied upon by TechLaw in developing its waste-in allocation for Studebaker Chemical. Please fax the requested documentation to me at 330-376-4577 and send a hard copy of the same to me at my office address listed below.

If you have any questions regarding this request, or if I can be of any additional assistance at this time, please do not hesitate to contact me directly.

Thank you.
